

AltoNFT Founding Creator Challenge 2026-2027

Bring your creative world to collectors.

From photography and illustration to generative art and animation, we invite you to release work that reflects your own creative voice. Choose an existing piece you are ready to share, or create something new, and become a Founding Creator on AltoNFT.

AltoNFT is an NFT marketplace and launchpad where you can offer your work as a digital collectible. Publish a single NFT or bring several works together in a drop that collectors can mint from. AI tools are optional, and no coding is required.

Your work, with the rights you choose

You keep your copyright and define how buyers may use your work. The challenge requires no additional advertising rights; the general platform terms still apply.

Alongside the audience you bring, people exploring other creators on AltoNFT can discover your work too. This is an opportunity for discovery, with no guarantee of reach or sales.

A Founding Creator badge, plus three creator awards

Every qualifying participant earns a Founding Creator profile badge. You do not need to make a sale to receive it.

An AltoNFT-team jury will also select up to three creators to receive 3,000 AI-Credits (AIC) each. Originality, quality of execution and the coherence of the overall concept carry equal weight. Follower counts and sales do not influence the selection.

AIC can be used for services offered for credits on AltoNFT, including optional AI tools. They are account-bound, non-transferable platform credits, not cash, and do not cover blockchain fees.

How to take part

During the challenge period, either:

- Mint a new NFT of your own work on AltoNFT and list it for sale. One NFT is enough.
- Create a new drop on AltoNFT using a suitable drop collection.

No separate application is needed. Existing artwork is welcome if you hold the necessary rights. Simply listing an NFT minted before the challenge does not qualify.

Dates and practical details

The challenge runs from 16 October 2026 at 18:00 to 28 February 2027 at 23:59:59, Europe/Berlin. It is open to eligible new and existing AltoNFT users aged 18+, subject to country restrictions and platform rules. A connected wallet and funds for blockchain fees are required.

There is no challenge entry fee. Blockchain fees and any applicable platform fees for qualifying activity are separate. Check the prices shown in the creation flow before proceeding.

For the AIC awards, qualifying works must remain publicly accessible and assessable during judging, 1-10 March 2027. Results will be announced by 15 March 2027.

Choose your work and explore the challenge:
